

STACK CARTONS

Environmentally
Friendly

Can be Printed with
Colours & Graphics

STACK CARTONS allow delivering produce to the customer safely and with the least amount of contamination.

Stack trays of mixed loads and sizes resulting in a cost effective and efficient system for the packaging and transportation of fresh produce. Stacking the trays also increases the stability of loads, reducing damage to fruit and vegetables during transit.

Stackable Trays

Can be Reused or
Composted

Great for:

- Home Delivery Food Boxes
- Moving office products
- Storing home office files, books and records etc
- Tidying up your kids messy home office

Great option to other bags which contain plastics:

- Plastic Crates that require handling and spread contamination
- Plastic Bags that don't stack and are bad for the environment
- Boxes which require taping, are difficult to unload, are not breathable

Separate Orders into
Liftible Amounts
