Quick & Easy
Strapping

StrapPack are a leading manufacturer of high-quality and reliable strapping and wrapping machines. Whatever industry you are in, StrapPack can provide a solution that will meet your requirements or that can be customised to you.

Purpose

Bundle and strap products together securely or fasten them to a pallet. Provide extra security for high value or heavy products.

Challenges

Traditional hand strapping tools can be slow and labour intensive. Cheap, poor quality strapping machines can be unreliable causing downtime in production. Machines often have to be sent 'back to base' for service and repair, causing disruption on the production line.

Solution

StrapPack makes strapping and bundling quick and easy. The packing process can be sped up with whatever level of automation suits your requirement. Engineers that will carry out service and repairs on site, minimising downtime. The machines can be supplied through outright purchase or on a rental agreement.

Benefits

- 12 month warranty on every machine
- Wide range of machines that can be fitted to every requirement
- 17 engineers located around the country that can do on site services and repairs
- Customised solutions available
